Product Description

STIHL BRA 200 Battery Powered Backpack Blower

MORE POWER THAN A 63CC BLOWER AND 16% QUIETER.

The STIHL BRA 200 is the quiet achiever of the battery-powered blower world. Weighing just 23 pounds with two AP 300 S batteries, it's lighter than your average toolbox or tool bag and designed to feel like an extension of your body. Perfect for early risers and noise-sensitive neighborhoods, it hums along at just 64 decibels—quieter than a normal conversation. The dual battery system works in your favor, drawing from one battery at a time and switching seamlessly with a quick trigger release. And thanks to STIHL's constant power technology, you get full performance from the first squeeze of the trigger to the last puff of battery life—no fading, no lag, just consistent airflow. That means no stopping, no swapping, just smooth, uninterrupted blowing. Whether you're a professional landscaper clearing a long driveway or a homeowner prepping the patio for a weekend barbecue, the BRA 200 delivers the kind of quiet, consistent power that makes the job feel effortless. It's simple to use, easy to carry, and hard to beat.
