Product Description

STIHL SE 122 Electric Wet/Dry Vacuum

Quiet, professional wet/dry vacuum for the toughest jobs.

Get a serious clean without serious noise. The STIHL SE 122 features a quiet, powerful motor —operating at only 62 dB(A) with 11% less noise than the SE 61. Plus, with 27% better suction and its larger 7.9 gallon capacity canister, the SE 122 can handle just about anything your job site can throw at it. Need to transition from one type of surface to another? This vacuum features a universal wet/dry suction head and foot-activated depth control, so you can switch from wet to dry surfaces seamlessly without needing to change the filter. Three cleanup tools —a universal tool, crevice tool, and adjustable floor tool— are easily stored on a self-contained tool keeper, so they're always at hand when you need them. It also features a ten foot suction hose and 25 foot electrical cord, so you can out-manuever your mess with ease. When work gets messy, this vac picks up just about anything, including the slack.
